

OneWrapPlus

PLUS FLEXIBILITY
PLUS FUNCTIONALITIES
PLUS IN ROBUSTNESS

SEMI-AUTOMATIC PALLET STRETCH WRAPPER

OneWrapPlus

The stretch wrapper that gives a “plus” to your production

SIAT OneWrapPlus is the new Siat machine that will allow you to maximize the results of your wrapping activity.

Drawn on the strong mechanical structure of Siat machines, it has an intuitive control panel that will make it easy to program it!

SIMPLE TO USE, COMPLETE IN FUNCTIONALITY

“Thanks to the icons on the control panel it is extremely **quick** to set a complete wrapping program that will optimize the film applied to all the different SKU you might need to wrap. This is not the only “Plus” of the machine: it has a very robust structure and the guarantee of a **2400 kg maximum weight** for the platform (excluding HSD platform). Your business would be purchasing a reliable and **high-quality** device!”

Moreover, with up to **10 customizable wrapping programs** that can be recorded, the operator will only have to program the OneWrapPlus once, and then simply recall the desired wrapping program from the control panel when required.”

PLATFORM SHAPES

OPERATIONAL FEATURES

5 different modes of operations:

- » Automatic Up Only or Up & Down wrap cycle;
- » Up & Down (or Up only) with Pause for top sheet
- » Manual Mode

Parameters to adjust:

- » Reinforcement loops up and down, (independent) pressing unit on/off
- » Carriage speed UP & Down (independent)
- » Turntable speed
- » Film tension (lay-on force)
- » Overlap (or carriage descent for top-sheet pause)
- » Photocell delay time

A SAFETY DRIVEN SOLUTION

“Siat likes to remind that in an industrial environment **safety** is always a leading topic. For this reason, all of our machines ranges are designed focusing maximum attention to the safety equipment on the unit.

Anti-fall device and a **safety plate**

under all versions of film carriage are fitted as standard, as well as many others safety features. Your machine will always be efficient thanks to the new possibility to upgrade the software version by simply inserting a USB key into the control board.

CONFIGURATIONS

Feature	Available configurations			
Platform	1650	1800	2200	1650 HSD
Mast	2200	2600	3000	
Carriage	M	FM	SM	LP
Carriage prestretch level (only LP)	150%	200%	250% (std)	300%
Photocell	Available as option			
Cutting system on LP carriage	Available as option			

OPTIONALS

- » Ramp for all the platforms sizes;
- » Pit frame;
- » Lifting frame;
- » Weighing system;
- » Pressing unit.

AVAILABLE CARRIAGES:

M

Simple functioning;

- » Manually adjustable lay-on force/tension;
- » Purely mechanical relationship between film regulation and applied tension;
- » Quick and easy to set;
- » Film reel weight has no impact on the brake/tension control.

FM

Simple functioning;

- » Better control on applying force to the stretching roll;
- » The machine is able to record different programs with different settings;
- » Application of the brake control on an different roll – instead of the coil holder- no influence of the coil weight.
- » Break regulation from control panel

SM

First pre-stretch concept applied;

- » Gear box pre-stretch system for an reliable but still basic approach;
- » Pre-stretch setting by an included set of different gears (30-60-90 % pre-stretch)
- » Mechanical pre-stretch

LP

Powered pre-stretch carriage;

- » Reliable pre-stretch up to 250% and 300%
- » Adjustable pre-stretch
- » Possibility to record and save different programs – easy and fast setting-
- » Improved stability of the load thanks to the most reliable pre-stretch value
- » No-cut pre-stretch rolls
- » Dancing Roller to follow the variation in the needed film tension

AIR PRESSURE REQUIREMENTS		
Compressed air min. pressure	6 bar	
Compressed air flow	Pressing unit height (mm)	Flow consumption for cycle (l)
	2200	9
	2600	12
	3000	14
